

The World's Leading Producer of Air Movement Products

Bathroom Exhaust

Bathroom Exhaust...

SOLVED!

If the strongest, quietest, bathroom exhaust system is what you seek...look no further. S&P offers the perfect solution with the most options. The popular and exclusive TD series bathroom exhaust kits (for single or dual venting points) the ultra powerful PV series (also, in single or dual vents) for long or complicated duct runs. All S&P bath kits offer remotely mounted fans featuring a powerful fan mounted in the attic (away from the living space). The result is a "Turbo" powered fan (much stronger than generally associated with bathroom exhaust) and yet a peacefully quiet operation. You also have the choice of the SWF sidewall series fan, featuring the powerful PV motor, when attic space or easy indoor access is difficult or not suitable for traditional in-line mounting.

Inline Fans For Bathroom Exhaust

TD-MIXVENT SERIES

The TD Series is the perfect bathroom ventilator for most typical installations. These units handle a significant amount of pressure (associated with most jobs) and unsurpassed air movement, with a minimum of space required. Suitable for 4" through 12" (kits available in 4" and 6") round duct applications, from 97-1050 CFM (cubic feet of air per minute). Strong, quiet, easy to install (in even the tightest spaces) and years of trouble free operation.

PV-POWERVENT SERIES

The PV Series is the perfect solution for installations that require long or complicated duct runs. These sturdy units are available for 4" through 12" round duct installations: from 108-942 CFM. The centrifugal blade designs are able to overcome extreme resistance for even the most challenging installations. The PV offers the same totally enclosed motors as the popular TD series which ensure long, trouble free life. The PV series is the right choice for more difficult installations.

Sidewall Fans For Bathroom Exhaust

SWF-SIDEWALL SERIES

The SWF Series' outdoor rated exterior housing provides easy access from the outside of a building or dwelling. This makes the SWF a great solution for installations where attic space or easy indoor access is difficult and not suitable for traditional PV style in-line mounting. The Sidewall Fan Series (SWF) of direct drive centrifugal ventilation fans consists of five model sizes: 4" through 8". All models are designed for direct connection in-line with standard diameter round ducting. Airflow performance values range from 119-416 CFM.

How to Size Your Bathroom Ventilation System

Bathroom Exhaust Advantages

We spend hours upon hours in our bathrooms; why not make them as comfortable as possible. No more loud noisy fans that instantly alert you the moment you hit the switch. S&P offers a range of inline and sidewall fans to fit exactly what you need that offer several advantages over traditional bathroom fans. Our remote mounted fans are powerful enough to vent multiple areas with one unit (dv kits) for today's larger bathrooms. Multiple bathrooms with one unit is also possible. The remote mounting feature, allows peace and quiet in the living space, thus reducing the sound level of a generally noisy fan. S&P remote fans also offer extended duty times, low maintenance and help to reduce moisture, which decreases the likelihood of mold or mildew. They do not detract from the homes aesthetics, unlike some unsightly roof mounted units. S&P remote fans are the clear choice for the strongest, quietest installation.

The following recommendations follow the Home Ventilating Institute (HVI) guidelines.

FAN SIZING FOR BATHROOMS UNDER 100 Sq. Ft.

The standard rule for bathrooms 100 square feet or smaller is one CFM per square foot of the bathroom. To find the square footage multiply the length of the bathroom by the width.

10' x 10' bathroom = 100 square feet.

You will need a 100 CFM fan for this bathroom.

FAN SIZING FOR BATHROOMS OVER 100 Sq. Ft.

Ventilation for baths over 100 square feet is calculated based on the fixtures in the bathroom. Allow 50 CFM for each standard toilet, shower, steam shower or tub. Whirlpool, garden and hot tubs are calculated at 100 CFM each. Add the CFM for all fixtures and you'll have the total CFM required for the bathroom.

Step 1 Calculate Bathroom Size: 20' x 10' Bathroom = 200 square feet

Step 2 1 Toilet + 1 Shower + 1 Tub = 150 CFM

Result **You will need a 150 CFM fan for this bathroom.**

For the most effective bathroom ventilation, HVI recommends eight air changes per hour. Fans should be installed as close to the shower as possible and, if marked as suitable for this location, directly over it to capture the moisture as directly as possible. Your fan should have a control that will allow the fan to run at least 20 to 30 minutes after each shower.

An enclosed toilet should have its own exhaust fan. Fans should be located over the shower or tub. Bathroom doors need to have at least 3/4" clearance to the finished floor to allow entry of makeup air. Using a timer or other control ensures that ventilation continues for a minimum of 20 minutes after use of the bathroom.

For steam showers, we recommend a separate fan in the steam room that you can turn on after use. Bathroom (continuous ventilation) should be available on a continuous basis at a minimum of 20 CFM in lieu of an intermittent 50 CFM fan.

TD - MIXVENT

Technical Specifications

Warranty

Five (5) year limited warranty.

Range

The TD-MIXVENT series consists of eight (8) nominal sized in-line fans. All models are specifically designed for direct connection in-line with industry standard diameter round ducting.

Construction

The TD-MIXVENT models 100, 100x, 125, 150, 200 and 200x are manufactured in tough reinforced plastic, models 250 and 315 have a metal casing and are finished in a tough epoxy-polyester paint coating. The TD fan duct connection flanges are manufactured from reinforced plastic, except for models 200, 200x, 250 and 315 which are constructed from epoxy-polyester coated metal.

Impellers

The impeller blades for models 100, 100x, 125 and 150 and 200x are molded in tough ABS plastic. Models 200, 250 and 315 are metal.

Motors

Models 100, 100x and 125 :

Single-phase, 120V 60Hz, shaded pole induction asynchronous motor in die cast aluminum. All motors include direct two speed connection and are also suitable for voltage speed control.

- Class II electrical insulation (model 100) & Class I (models 100x and 125)
- IP 44 Protection
- Class B Motor Insulation
- Safety auto reset Thermal Overload Protection (fuse type)
- Self-lubricating sleeve bearings.
- Suitable for working airstreams up to 104° F (40°C).

Models 150, 200, 200x, 250 and 315:

- Single-phase induction asynchronous motor, with permanent capacitor and external rotor constructed of die cast aluminum. All models include direct two speed connection and are also suitable for voltage speed control.
- Class I electrical insulation
- IP 44 Protection
- Thermal Overload Protection
- Class B Motor Insulation
- Sealed For Life, ball bearings
- Suitable for working airstreams up to 140° F (60°C).

IMPORTANT: If venting in an non-insulated attic space, or in a cold climate, insulated flexible duct is strongly recommended for condensation issues.

Sound

Fan sound levels are measured in sones. At this time there are no sone level test standards available through HVI due to the fact that remote mounted fan noise levels are in proportion to the following: type of duct, length of duct, fan distance from the intake source and other miscellaneous factors. However it is generally accepted that remote mounted venting is usually quieter than standard (in room) venting.

Soler & Palau USA certifies that the TD range shown herein is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

The TD-MIXVENT Series fans are California Title 24 compliant and meet ASHRAE 62.2 when installed with 3 way switch and remotely mounted speed control.

PV-POWERVENT

Technical Specifications

All twelve PV model sizes (PV 100, 100x, 125, 125x, 150, 150x, 200, 200x, 250, 250x, 315 & 315x) include the following specifications:

Warranty

Five (5) year limited warranty.

Casing

- Manufactured from high grade pressed galvanized steel, with black baked enamel coating.
- Extra long inlet and discharge collars make installation quick and trouble free.
- Supplied with a strong galvanized steel mounting bracket.
- Supplied with a remote mounting, prewired wiring junction box.

Wheel / Impeller

- Backward curved centrifugal type constructed of metal.
- Factory matched to an external rotor motor and dynamically balanced to eliminate vibration.

Accessories

A wide range of accessories is available to complete the most demanding installation. See pages 8 & 10.

Motor

- Totally enclosed permanent split capacitor start and run external rotor motors.
- 115V 60Hz (single phase) electrical connection.
- Permanently sealed, self lubricating precision ball bearings.
- Safety Thermal Overload Protection Cut-Out (Automatic Reset Type).
- All Models are suitable for working airstreams up to 140° F

Code Approval

- All models have been independently safety tested by Underwriters Laboratories, Inc. and are UL and cUL Listed.
- Independently safety tested by Intertek Laboratories, and are ETL Listed.
- Independently tested for Airflow Performance. The PV range is licensed to bear the AMCA seal for Air Performance.
- The PV product range is certified by the Home Ventilating Institute (HVI) for Air Performance.
- PV 150x and larger ENERGY STAR® qualified.

Sound

Fan sound levels are measured in sones. At this time there are no sone level test standards available through HVI due to the fact that remote mounted fan noise levels are in proportion to the following: type of duct, length of duct, fan distance from the intake source and other miscellaneous factors. However it is generally accepted that remote mounted venting is usually quieter than standard (in room) venting.

Soler & Palau USA certifies that the PV range shown herein is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

*PV 150x and larger ENERGY STAR® qualified.

The PV-POWERVENT Series fans are California Title 24 compliant and meet ASHRAE 62.2 when installed with 3 way switch and remotely mounted speed control.

SWF-SIDEWALL

Technical Specifications

All five SWF models sizes (SWF 100, 100x, 150, 150x & 200) include the following specifications:

Warranty

Five (5) year limited warranty.

Casing

- Manufactured from high grade pressed galvanized steel, with baked enamel coating.
- Removable top for easy access to motor for cleaning or inspection.
- Large grill opening for easy passing of lint and other potentially clogging materials.
- Includes prewired terminal box.

Wheel/Impeller

- Backward curved centrifugal type.
- Factory matched to an external rotor motor and dynamically balanced to eliminate vibration.

Accessories

- A wide range of accessories is available to complete the most demanding installation.

Motors

- Totally enclosed permanent split capacity start and run external rotor motors.
- 115V 60Hz (single phase) electrical connection.
- Permanently sealed, self lubricating precision ball bearings.
- Safety Thermal Overload Protection Cut-Out (Automatic Reset Type).
- All models are suitable for working airstreams up to 140°F.

Code Approval

- All models have been independently safety tested by Underwriters Laboratories, Inc. and are UL and cUL listed.

Sound

All products manufactured by S&P have undergone extensive tests and quality assurance programs to ensure that the products supplied meet the latest international performance and safety standards. Soler & Palau is an ISO9001 registered company, and has onsite ENAC and AMCA third party accredited test laboratory facilities.

KIT Bathroom Exhaust Kits

Featuring TD-MIXVENT Kits

The TD-MIXVENT fan kits provide all the hardware needed to complete a simple in-line ducted ventilation installation. The kit includes a powerful TD in-line fan, exterior and interior grills, tough flexible aluminium ducting and a roll of duct tape.

The TD-MIXVENT fan kit is the ideal solution for any simple in-line ducted fan installation.

IMPORTANT: If venting in a non-insulated attic space, or in a cold climate, insulated flexible duct is strongly recommended for condensation issues.

Standard Exhaust Kits

KIT-TD100

- 1 TD100 Exhaust Fan
- 1 Plastic round grill (BOR-100)
- 1 Exterior fixed grill (GR-100)
- 4 in. Flexible ducting (GSA) 13 ft.

- 1 PV100 Exhaust Fan
- 1 Plastic round grill (BOR-100)
- 4 Nylon tie wraps (TW-4)
- Mounting Bracket

KIT-PV100x

- 1 PV100x Exhaust Fan
- 1 Plastic round grill (BOR-100)
- 4 Nylon tie wraps (TW-4)
- Mounting Bracket

KIT-PV150

- 1 PV150 Exhaust Fan
- 1 Plastic round grill (BOR-150)
- 4 Nylon tie wraps (TW-6)
- Mounting Bracket

All PV kits have standard 8-year warranty.

PV Deluxe Exhaust Kits

KIT-PV100x-DV

- 1 PV100x Exhaust Fan
- 2 Plastic round grills (BOR-100)
- 1 Y-fitting (SY-4)
- 7 Nylon tie wraps (TW-4)
- Mounting Bracket

KIT-PV150-DV

- 1 PV150 Exhaust Fan
- 2 Plastic round grills (BOR-150)
- 1 Y-fitting (SY-6)
- 7 Nylon tie wraps (TW-6)
- Mounting Bracket

KIT-PV200-DV

- 1 PV200 Exhaust Fan
- 2 Plastic round grills (BOR-200)
- 1 Y-fitting (SY-8)
- 7 Nylon tie wraps (TW-8)
- Mounting Bracket

CVK-100 - Convert-a-Kit Bathroom Exhaust Kits

Reduce the noise of your existing bath fan and replace it with a quiet S&P inline fan! S&P's Convert-a-Kit Bathroom Exhaust Kit (CVK-100) includes all of the components that you need to disable your current fan and connect to a new S&P fan. Best of all, you choose which 4" S&P fan is most compatible with your installation!

Features of Convert-a-Kit:

- No ceiling or drywall repairs
- Use existing fan housing and grill
- ENERGY STAR® Qualified (TD models)
- HVI Certified
- UL Listed
- All fans include a five year warranty

The CVK-100 Kit Includes:

- 8 ft. of 4 in. insulated flexible duct
- 4"-3" duct reducer
- 12 ft. 14-2 electrical wire
- Wire nuts
- Cable restraint
- Screws
- 2 Nylon tie wraps.

Bathroom Exhaust Accessories
