**Soler & Palau Canada Launches New Belt Driven Utility Vent Sets –  
Model CM**

**Mississauga, Ontario, July 1, 2011** - Soler & Palau Canada announces the launch of the new CM Belt Driven Utility Vent Sets. This line is available in a full range of sizes (10 through 36) providing airflow performance from 500 CFM to over 25,000 CFM with static pressure capabilities up to 5 in. w.g. This single inlet backward inclined, CW or CCW orientation, utility fan provides substantial benefits for pressure flow, low power consumption and low noise level, ideal for commercial and industrial applications. Typical applications include either supply or exhaust service for ducted systems in schools, theaters, gymnasiums, manufacturing plants, hotels, office buildings, restaurant hoods, and many other general ventilation applications.

Model CM is solidly built, the housing joints are welded intervals and the backward inclined wheel is constructed of steel blades protected with a polyester powder coat finish. The entire unit is constructed of steel with corrosion resistant epoxy powder coating.

Model CM sizes 12-36 are AMCA Licensed for Air and Sound, and the entire line (10-36) is cULus 705 or 762 listed. As well, the CM Line is cULus 793 listed for smoke control systems, designed to withstand inlet temperatures of 500°F for 4 hours and 1000°F for 45 minutes.

**About Soler & Palau**

Founded in Ripoll, Spain in 1951, today Soler & Palau is a world leader in ventilation with production centers in Europe, the Americas and Asia. Soler & Palau's product portfolio includes ventilation products and accessories for industrial, commercial and residential applications large and small including roof mounted, wall mounted and inline fans, centrifugal direct drive and belt drive blowers, bathroom exhaust fans and the award winning TD-series, mixed vent inline fans. Soler & Palau has gained a reputation for the highest quality, performance and energy efficient ventilation products by providing innovative products at a competitive price.
