BATHROOM FAN SIZING

FAN SIZING FOR BATHROOMS UNDER 100 SQUARE FEET

The standard rule for bathrooms 100 square feet or smaller is one CFM per square foot of the bathroom. To find the square footage, multiply the length of the bathroom by the width.

9'

5'

45 sq.ft.
The minimum recommendation is a fan rated at least 45 CFM.

Ventilation for baths over 100 square feet is calculated based on the fixtures in the bathroom (see table below). Add the CFM of all fixtures within the bathroom for the required fan CFM. Enclosed toilet rooms must have an operable window or a fan for ventilation.

CFM REQUIRED PER FIXTURE

Toilet	50 CFM
Shower	50 CFM
Bath Tub	50 CFM
Jetted Tub	100 CFM

EXAMPLE

1 Toilet	50 CFM
1 Jetted Tub	100 CFM
Required CFM	150 CFM

SOLUTION

1. Install a 100 CFM fan over the tub, 50 CFM fan in the shower and above the toliet. This method will provide ventilation where and when it's needed.
2. Install one 150 CFM fan. The air will be pulled through the entire room and exhausted at a central location.

For more information on bath fan sizing and ventilation, visit www.hvi.org.

IMPROVE IAQ WITH THE PREMIUM CHOICE SERIES

Americans spend 90% of their time INDOORS.

Indoor Air can be 2-5 TIMES MORE POLLUTED THAN OUTSIDE AIR

The EPA ranks INDOOR AIR POLLUTANTS as a TOP FIVE HEALTH RISK.

As buildings are being built with higher quality construction methods, balanced ventilation methods are more important than ever. An unbalanced home results in poor Indoor Air Quality (IAQ), causing inadequate conditions for your home and the inhabitants. As codes change, it is important for you to understand why Indoor Air Quality is so important and the options available to you from S&P USA.

Locate the best fan for your project to the right.

STRESS-FREE INSTALLATION

PLUG-&-PLAY DESIGN

ENERGY EFFICIENT

+ Sones represented at .1" of Static Pressure

PLUG-&-PLAY MODULES + GRILLES

S&P's unique Plug-&-Play options make your CHOICE easy. Whether you're looking for a Speed Control, Humidity Sensor, Motion/Humidity Sensor or VOC Sensor, there is a control that connects to the receptacle and easily mounts into the pre-drilled holes inside the fan housing.

There is a receptacle for your grille CHOICE. Need a lighted fan? Choose the fluorescent or LED Lighted Grille Kits. Need a motion sensing fan? Choose the Motion Sensing Grille Kit. Either grille easily plugs into the grille receptacle to give you the fan of your CHOICE!

PC Fan models include receptacles based on compatibility. Learn more in our Accessories section.

AUTOFLO™ FROM S&P USA

Autoflo™ is an innovative technology that automatically adjusts the fan speed based on the actual Static Pressure in the duct system ensuring a specified amount of airflow. **Available on PCD 80XHP and PCD110XP.**

Premium *Choice* Series
Ventilation Fans
PCLPD100XHP

PCLPD100XHP
LOW PROFILE CEILING OR WALL MOUNTED EXHAUST FAN WITH DC MOTOR

S&P's Premium Choice Series Bathroom/Exhaust Fan model PCLPD100XHP is built for today's demanding requirements featuring seamless Plug-&-Play integration and a redesigned blower for a quiet, energy efficient performance. The PCLPD100XHP also features an ultra-low profile that allows easy installation into a wall, eliminating the need for a radiation damper to meet fire-resistance requirements in building code.

KEY FEATURES

- Ultra-Low Profile Design to fit in the smallest wall cavities
- Ultra-Quiet Operation as low as 0.6 sones
- DC Motor for high efficiency with auto-flow technology
- Built-in Humidity Sensing and Continuous low speed capability

PCIAQSP
VOLATILE ORGANIC COMPOUND (VOC) AND HUMIDITY SENSOR

- Detects VOCs and/or rapid rise in humidity at the ceiling
- Speed control to run fan continuously
- Meets Calirfonia Title 24 bathroom fan requirement (CALGreen)

- Detects rapid rise in humidity
- Auto-shut off timer
- Accessible sensitivity adjustment
- Meets Title 24 bathroom fan requirement

- Provides seamless two speed operation without additional wiring at the wall switch
- Accessible speed adjustment
- High speed override
- Allows for adjustable continuous speed to meet ASHRAE 62.2

WALL CONTROLS OPTIONS

3-SWITCH CONTROL
PC3S

- Three Rocker Combination Switch with ground screw terminals and push-in wiring

FAN/LIGHT DELAY TIMER SWITCH
FLTD-60

- Saves energy by automatically turning exhaust fan off
- One Switch controls fan and light
- Digital Timing circuit
- Fits single switch outlet box

ROTARY SPRING WOUND TIMER
SRT-30

- Hold feature enables user to override the automatic shut-off function
- Press-on knob design ensures quick and easy installation
- CFL Compatible

ELECTRONIC PUSH BUTTON TIMER
EPBT-60

- 10-20-30-60 minute timer
- Activate by pushing the button

ASHRAE 62.2 BATH FAN VENTILATION CONTROL
FT-622

- Programmable DELAY and VENTI-LATION settings
- Works with ALL incandescent, CFL, fluorescent and LED lights up to 450 watts
- Earn LEED and ENERGY STAR points for enhanced exhaust ventilation

PROGRAMMABLE FAN TIMER 24 HOURS/ 7 DAYS
FT247

- Hold feature enables user to override the automatic shut-off function
- Press-on knob design ensures quick and easy installation
- CFL Compatible
