

2521- Potentiometer Speed Control

Dimensions (LxWxH): 3.25" x 3.25" x 2.5"

Features

The Potentiometer 0-10V speed control can be factory mounted to the fan or shipped loose for remote speed control of S&P EC motors.

When installed in the fan housing, the Potentiometer is installed in a standard 2X4 electrical junction box.

If remote mounting is desired, the control is shipped loose and can be mounted with the supplied electrical enclosure.

The 10V power supply to operate the speed control is provided by the EC motor and no additional accessories are required with the exception of the low voltage control wire to span the distance from the control to the fan motor.
